

I urge the FCC to reject the National Association of Broadcasters' petition 04-160. I support XM Satellite radio in its efforts to provide variety, quality, and service to its customers by providing traffic, weather and other informational channels. I travel in my work. These services are invaluable to me in my job, and I pay extra for XM Satellite Radio to keep me in tune with this information. I strongly object to the NAB's proposed interference with this paid benefit.
